

## FIRST LEVEL TRAINING COURSE IN ULTRASOUND: DIAGNOSTIC AND INTERVENTIONAL PROCEDURES

### Objectives

The proposed training course is aimed at enhancing the knowledge and skills in the field of ultrasound in order to develop either the necessary skills to reach autonomously an ultrasonographic evaluation than learning the ultrasound-guided interventional procedures.

The innovative simulation system LOAPHSim is designed to allow direct execution of both diagnostic and interventional tasks for young doctors, providing a quantitative and continuous feedback of their performance.

### Course details

The course provides the use of a hybrid simulator with augmented reality.

It takes place over one day and consists of two modules: a diagnostic and interventional one. To access the interventional module the trainee should pass the diagnostic module test.

### Participation fees (special offer until December 31, 2016)

- ❖ 500€ + VAT for participant
- ❖ 400€ + VAT (residents/students)

### Dates

- ❖ September 22
- ❖ October 6; 20
- ❖ November 10; 24
- ❖ December 15

To participate in the training activities please write to the address below indicating the course date you want to register and your personal details. On request, it is possible to organize courses for the provision of CME credits.
