

TRAINING COURSE IN ENDOVASCULAR AND CARDIOVASCULAR SURGERY

Objectives

The training course comprehensively introduces the learner to basic endovascular and angiographic skills. Moreover it also addresses the need to consolidate and enhance the technical expertise to perform surgical procedures of increasing difficulty and complexity including the:

- ❖ *endovascular treatment of peripheral artery disease;*
- ❖ *renal angioplasty and stenting procedures;*
- ❖ *carotid stenting procedure;*
- ❖ *endovascular aneurysm repair of the abdominal aorta (EVAR);*
- ❖ *endovascular aneurysm repair of the thoracic aorta (TEVAR);*
- ❖ *cardiac catheterization, diagnostic coronary angiography, angioplasty and stenting .*

Course Details

The course includes didactic sessions followed by practical training on two last-generation simulators:

- ❖ BEST Trainer, physical simulator for the acquisition of basic endovascular skills;
- ❖ Angio Mentor™, an advanced system for the virtual simulation of endovascular and cardiovascular procedures.

A one day course will be organized every month.

Participation fees

- ❖ For single participant: 700 €
- ❖ Special offer for residents : 500 €

On request, it is possible to organize courses for CME credits.
